

Fully Auto Laser Marking System

Laser Marking Series

The LM-Series are high speed and accurate laser marking systems with an optimal marking performance. This system offers the flexibility of manual and automated loading and unloading with optional (before & after) vision inspection.

The system can be tailored towards the most suitable types of laser module depending on the material, surface and marking speed requirements. The optional integrated camera can be used for pattern identification, 2D or barcode reading and comes with integrated networking mapping capabilities.

The LM-Series are capable of running multiple types of packages on one machine at a high and accurate speed, specifically suitable for the semicon industry.

Laser Marking Series

Specification

Configuration	Stand-alone	
Laser Module	YV04 or CO2 Laser Module	
Actuators	Indexer	Step Motor + Ball Screw drive
